

## **Asset Management as a Quest: - The First 10 Years and the First 10 Questions**

These are the questions that we examine in the first volume in Talking Infrastructure's 'The Story of Asset Management' series.

To see these questions in context,  
download "Asset Management as a Quest - Contents"

You can also preview Part One of "Asset Management as a Quest"  
discussing the first two questions in this list, [here](#)

- 1: How much does it cost South Australians to get their water services?
- 2: What is the likely cost and timing of renewing water assets?
- 3: What is the cost and timing of renewal for all state infrastructure: Public Housing, Hospitals, Schools and Colleges, Highways, Transit, Power and Water.
- 4: What can be done to contain costs?
- 5: How do we instill an AM mindset?
- 6: How do we spread the word about asset management and its benefits?
- 7: What are the consequences if AM is not understood?

8: Are our tools and data up to the challenges we now face?

9: How do we advance the narrative but also keep it focused?

10: How did NSW move the story forward and what can we learn from its actions?
